Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 12, 15, and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Murray (5,996,178) in view of Han (6,085,387).

'718 discloses the invention as claimed, including a folder 102, a terminal 108, a hinge housing 3858, end opening 3854, a protrusion 3814, a valley-shaped portion 3818, a hinge cam of mountain-shaped 3828, a spring 3806, and a hinge dummy having holes crossing each other forming a Y-shape socket 3682 fixed to the inner surface of the side arm 208 to receive the Y-shaped protrusion 3814. The Y-shaped socket can be selectively coupled with the Y-shaped protrusion. However, '718 does not show a separate hinge housing received in the center arm. '718 forms hinge housing as an integral part of the center arm. '387 teaches a housing containing all the hinge components to form a self-contained hinge device to achieve miniaturization and to allow smooth and accurate relative motion between the cam portion and the cam follower. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the integral hinge housing of '718 with a separate housing containing all

the hinge components as taught by '387 to achieve miniaturization and provide smooth and accurate motion between the cam and cam follower.

Allowable Subject Matter

3. Claims 1-11 are allowed.
4. Claims 13, 14 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chuck Mah whose telephone number is (571)272-7059. The examiner can normally be reached on 5/4-9.
